Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The 112 rejections are withdrawn due to Applicant's amendments. The 102 rejection over Kamijima is withdrawn due to Applicant's amendments. The IDS is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 3-4 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 6,165,587 to Nonaka .
4. Nonaka teaches claim 3 a patterned film made of a conductive material, the pattern film is (2, FIG. 3 and associated text) disposed on a base layer (1, FIG. 3 and associated text) and including a linear portion and including a plurality of linear portions disposed side by side (see the zig-zag "T" shaped pattern 5, FIG. 3 and associated text comprised of horizontal and vertical linear portions), wherein the linear portion has a first portion and a second portion, wherein the second portion is closer to the base layer than the first portion, and wherein the second portion touches the base layer, (see pattern of FIG 3 and col. 6, lines 9-14), the second portion having a width greater than (see wider portion the horizontal part of the inverted "T" shape pattern) a width of the first portion (see vertical portion of the inverted "T" shape pattern). Claims 3-4 are met.

Response to Arguments

5. Applicant's arguments filed 03-31-06 have been fully considered but they are not persuasive. Applicant argues that while Nonaka teaches the inverted T shape, Nonaka doesn't teach a conductive material. Applicant's arguments are not found persuasive because Nonaka teaches the inverted T shape and a patterned film of a conductive material such as metal at col. 4, lines 4-6. See again 1, 2, and 5 and FIG. 3 and associated text.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
